Subject: BioShield "75"

To Whom It May Concern:

I would like to personally recommend a product that was introduced to me at a Seminar in Winston-Salem NC on September 14, 2005.

This product ,BIOSHIELD "75" was demonstrated by Mr. Carl Saporiti during the program. A month or so later Mr. Saporiti visited our hospital and met with myself and the Infection Control Practioner. As with most new products I was somewhat skeptical since there seem to be new products making new claims on a daily basis.

This product opened our eyes to a safer and a more effective solution to some of our concerns. I felt that the true test would be with our showers, shower curtains and some tub areas that frequently showed mildew after a short period. The test also included areas that are not used as often as others.

We thoroughly cleaned some of these areas and coated them with the Bioshield "75". It has now been three (3) months since the product was used. As of today **NO MOLD OR MILDEW** has returned.

I am most sure that this product will work well in most any application and we look forward to using it in other areas.
